three-in-one
composite
solution

Charisma® Topaz

Innovative chemistry for day-to-day natural restorations.

FREE
of BPA related
monomers

Giving a hand to oral health.

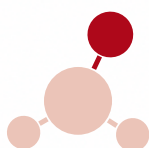

KULZER
MITSUI CHEMICALS GROUP

Savour the effortlessness of easy handling.

- The soft, yet low-sticky consistency of Charisma Topaz improves the efficiency during modelling thanks to its increased stability.
- The extended working time even under operating and ambient light allows for easy, stress-free modelling in any indication.
- Our filler system with nano particles facilitates polishing and ensures both a high, long-lasting gloss and high patient satisfaction.

Benefit from superior physical properties.

- We can allow ourselves to promise reliability and quality with Charisma Topaz, which are the key factors for long-lasting restorations. Its patented TCD matrix combines high strength with minimal shrinkage, both are important material properties which can minimise the risk of fractures and secondary caries.
- Its good radiopacity enables a safe and reliable diagnosis.
- You do not need to change any of your proceeding habits, as Charisma Topaz is compatible to all conventional bonding materials and techniques.

Take advantage from versatility in layering.

- Use the easy single-shade layering with universal shades for your less complex cases and reduce your layering efforts to a minimum.
- The multi-shade layering possibilities allow natural layering also of complex cases. Choose from three levels of opacity plus bleach shades.
- With Charisma Topaz, restorative margins are virtually undetectable due to the excellent shade match.

FREE
of BPA related
monomers

The patented TCD-matrix is
free of BPA related monomers

Charisma® Topaz

Innovative chemistry for day-to-day natural restorations.

Easy handling meets innovative formula for aesthetic versatility.

The Charisma brand is trusted all over the world for its easy handling, high quality and reliability in restorations. That is why incorporating the most successful features of Charisma composites in one product just seemed logical to us.

The result will satisfy you and your patients in equal measure. Charisma Topaz is a light-curing, radiopaque nano-hybrid composite that features our unique TCD matrix. This innovative formula combined with the approved easy Charisma handling works as the foundation for down-to-earth restorations of natural beauty.

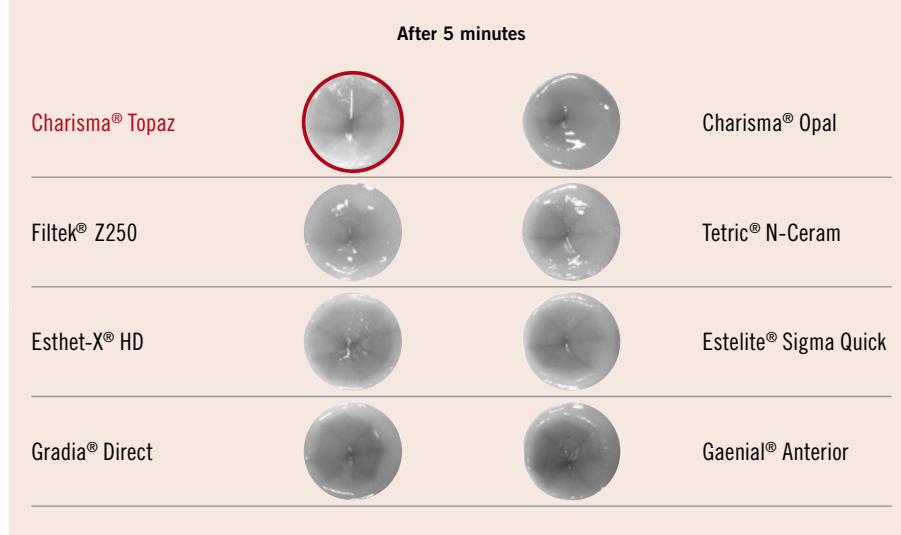

Charisma® Topaz

Down-to-earth natural beauty.

Savour the effortlessness of easy handling.

Charisma Topaz offers a creamy, yet stable consistency

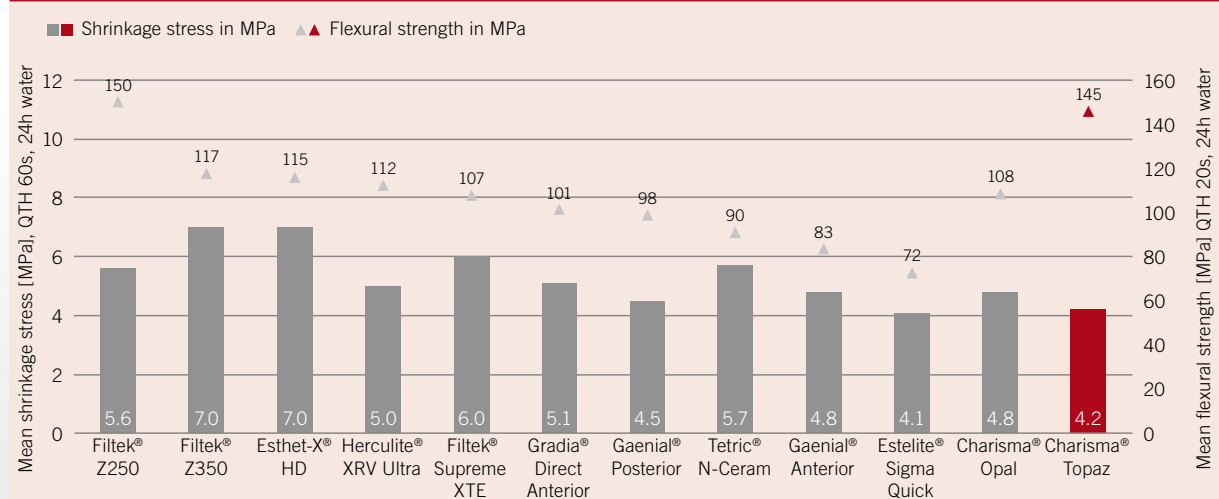

Five minutes after a diamond form was pressed into the composite, Charisma Topaz still shows sharp and stable impressions whereas other composites show unfavorable slumping.

The scope of bonding in one bottle, that is GLUMA® Bond Universal.

You do not want to change your bonding habits? You would like to keep your bonding routines as easy as possible? Based on our long-term bonding expertise, we developed GLUMA Bond Universal – a universal bonding answering to all your bonding needs. It is a reliable and highly effective adhesive that ensures successful long-term restorations.

One bottle of our genuinely universal adhesive brings you manifold benefits:

- One bottle for any bonding technique: total-etch, selective etch, and self-etch.
- One bottle for all dental materials.
- One bottle for a broad range of indications of direct and indirect restorations and intraoral repairs.
- One bottle for easy and safe handling with state-of-the-art performance.
