Product Information

Variotime®

Freedom to impress.

Giving a hand to oral health.

With Variotime®

your freedom is ready to hand.

Variotime fits your personal style.

You never linked impressions with freedom? You will now. Variotime comes with a variable time concept which provides more leeway with starting the setting time. It thereby allows greater handling freedom. This means less stress for you – and puts your patients more at ease, as well.

Ease also comes with trusting the material attributes. You place high demands on the quality, consistency and physical as well as handling properties of your impression material. You also need process-oriented adaptability for a wide range of indications. It's what you get with our innovative A-silicone. On top of the variable time slot.

We want you to experience the splendid feeling of freedom and reliability.

Think vario – Freedom can be this simple.

Win a free hand in precision impressions.

Benefit from straightforward, adaptable handling:

- Mixed automatically, using the Dynamix speed System.
- One material with variable applications for single crowns as well as multi-unit prosthetic restorations.
- Variable working time, ranging from 1:00–2:30 minutes.
- Short intraoral setting time of 2:30 minutes.
- Convenient, time-saving working.

Gain more leeway with starting the setting time		
Variable Working Time As little as 1:00 min or up to 2:30 min!		Short Intraoral Setting Time Always 2:30 min!
Multiple-Unit Impression	2:30	2:30
Single-Unit Impression	1:00	2:30

► Variotime controls the polymerisation kinetics by mouth temperature and sets rapidly after insertion into the mouth.

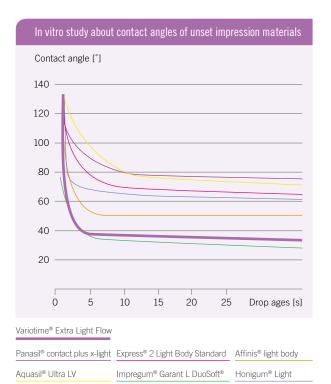

Variotime®

Certainty leads to freedom.

Variotime performs splendidly in the wet sulcus.

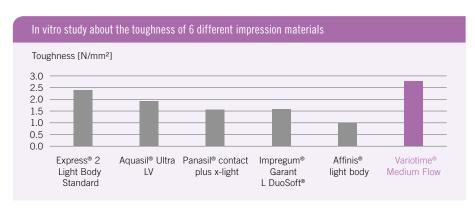

Enjoy its precision of fit — It's your advantage:

- Low dimensional changes (-0.001 %) ensure most exact dimensional accuracy*.
- Reproduces surface roughness details of under 20 µm**.
- Convincing hydrophilic properties for a high reproduction of details.
- * Source: Piwowarczyk, A. *et al.*, In Vitro Study on the Dimensional Accuracy of Selected Materials for Monophase Elastic Impression-Making, Int J Prostodont 2002; 15: 168–174. The material tested in this study is equal to the product Variotime Monophase.
- ** Source: Kanehira, M. et al., Surface detail reproduction with new elastomeric dental impression materials. Quintessence Int 2007; 38: 479–488.
- ► The contact angles of a water drop on Variotime Extra Light Flow — a measurement for hydrophilicity — are on the polyether level and allow Variotime's excellent performance in the wet sulcus.

▶ In this study, Variotime Medium Flow exhibited the highest toughness which enables the prevention of tearing of flashes and distortion upon removal.

The all-rounder among A-silicones.

Variotime is the right choice for numerous occasions.

The Variotime assortment is a well-thought-out, coordinated all-round system for all impression techniques. Apart from being beneficial to your time line.

The Dynamix® speed System

High-speed precision in no time.

Go double speed.

You set the pace in taking impressions, we just provide the opportunities for efficiency and time saving.

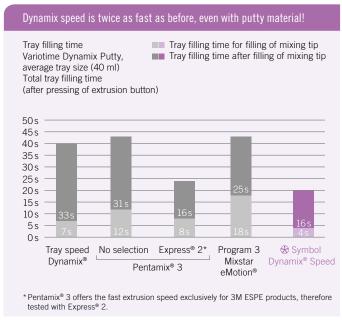

Practical cartridges and the functional Dynamix speed mixer are perfectly matched in this well-thought-out system featuring all the advantages of automatic mixing for impression materials, above all even more time savings due to high speed, simple handling and a consistent, void-free mixture. Together with the consistency of the material, this is the foundation for precise results.

Benefit from easy, reliable and efficient handling:

- High-speed mixing and precise dispensing, also for Putty viscosities.
- Savings in time and materials.
- 3 selectable velocities including a new high-speed option.
- Automatic propulsion and reverse drive of plungers at the press of a button.
- Clearly marked functional elements.
- Cartridges marked with Dynamix speed symbol.

Rely on quality and precision – again and again:

- Homogeneously and void-free mixed impression materials leading to precisely fitting prosthetic restorations.
- Reproducible material properties.
- Consistent quality of mix, independent of operator, for consistent precision of fit.

Variotime® / Dynamix® System

Product range.

Dynamix Cartridge Refills

Variotime Dynamix Putty Refill 3x(2x380 ml) Dynamix Putty 3x2 Dynamix Mixing Tips 3x1 Dynamix Fixation Ring

Art. code: 66044995

Variotime Dynamix Heavy Tray Refill

3x(2x380 ml) Dynamix Heavy Tray 3x2 Dynamix Mixing Tips 3x1 Dynamix Fixation Ring Art. code: 66045000

Variotime Dynamix Monophase Refill

3x(2x380ml) Dynamix Monophase 3x2 Dynamix Mixing Tips 3x1 Dynamix Fixation Ring Art. code: 66045034

50 ml Automix Cartridge Refills

Variotime Heavy Tray Refill 6x(2x50ml) Heavy Tray 6x5 Mixing Tips green Art. code: 66044998

Variotime Monophase Refill 6x(2x50ml) Monophase 6x5 Mixing Tips green Art. code: 66045032

Variotime Medium Flow Refill 6x(2x50ml) Medium Flow 6x10 Mixing Tips yellow Art. code: 66045036

Variotime Light Flow Refill 6x(2x50ml) Light Flow 6x10 Mixing Tips yellow Art. code: 66045038

Variotime Extra Light Flow Refill 6x(2x50 ml) Extra Light Flow 6x10 Mixing Tips yellow Art. code: 66045040

Variotime Bite Cartridge Refill 3x(2x50ml) Variotime Bite 3x10 Mixing Tips green Art. code: 66045042

Handmix Trial Kit

Variotime Easy Putty + Flow Trial Kit 1x600 ml Easy Putty (each 300 ml Base & Cat.) 1x50 ml Light Flow 5x Mixing Tips yellow 5x Intraoral Tips 1x Universal Adhesive (10 ml) Art. code: 66045044

Handmix Refill

Variotime Easy Putty Refill 4x600 ml Easy Putty (each 4x300 ml Base & Cat.) Art. code: 66044993

Variotime® Bite – Freedom to impress.

Benefit from exceptional accuracy for universal bite registration.

The bite registration is a vital step in the preparation of indirect restorations. You need to rely on it whenever you need it. And you wouldn't want to compromise on the quality of the material just now. Precision of fit is what you are accustomed to from our Variotime precision impression material. And with Variotime Bite you can count on precision of fit in the field of bite registration as well. Variotime Bite delivers exceptional accuracy for universal bite registrations and superior powder-free scannability for use with CAD/CAM technology.

- Extra-high final hardness of Shore D 40.
- Extremely fast intraoral setting time of only 30 seconds.
- Distinct thixotrophy and whipped-cream-like consistency.
- Easy to trim and grind with minimal risk of fracture.
