

Filtek™ Z250

Universal Restorative

10 Years

All-around versatility. 10 years of proven performance.

Summary of advantages

- **Long-term clinical history:** 10 years of clinical service
- **Excellent handling:** resists slumping, and virtually no sticking to instruments
- **Outstanding versatility:** useful for anterior and posterior restorations
- **Speed and convenience:** easy-to-use, cures in just 20 seconds
- **Natural esthetics:** available in multiple shades matching tooth structure
- **Radiopaque**

Filtek™ Z250 Universal Restorative “Silver Edition” marks a decade of clinical success.

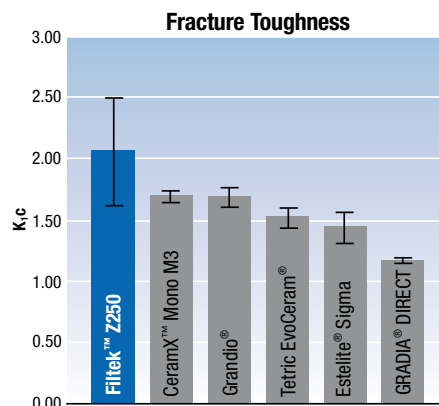

Since it was introduced, dentists around the world have trusted Filtek Z250 restorative to create strong, long-lasting, natural-looking restorations. In fact, it has now grown to exceed 35 million restorations globally per year. 3M ESPE is recognizing this achievement, and its 10-year anniversary, with a special “Silver Edition” label.

The classic in hybrid technology meets a variety of needs with beautiful results.

Versatility in anterior and posterior use is one reason dentists choose Filtek Z250 restorative. But the main reason is they know they’ll achieve the results they want, due to the product’s consistent, excellent performance.

- **Esthetics** include a wide range of shades and it’s easy to finish and polish.

- **Excellent marginal adaptation** makes it easy to model.
- **Proven physical properties** include reduced shrinkage for less post-operative sensitivity, low wear and high fracture toughness.

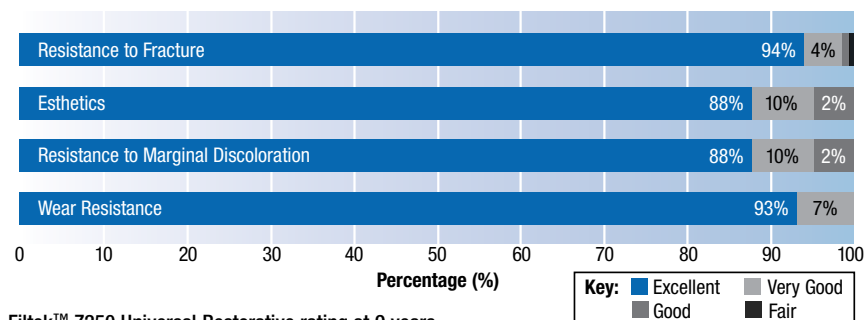

Results of a single notch fracture toughness test proves Filtek™ Z250 Universal Restorative is more fracture-resistant than leading composites tested.

3M ESPE

Filtek™ Z250 Universal Restorative receives top ratings from The Dental Advisor.

A respected publication dedicated to improving patient care through education and research, recalled and reviewed more than 560 restorations at nine years. The study results proved Filtek Z250 restorative offers remarkable wear resistance and overall strength. In addition, the restorations remained smooth and color-stable to earn a “very good to excellent” rating for esthetics. The study confirms Filtek Z250 restorative is suited for both anterior and posterior use.

Filtek™ Z250 Universal Restorative rating at 9 years.
